

Computer-Based Training (CBT) Lesson 1

Classics for Kids (classicsforkids.com)- **Games**

The screenshot shows the top navigation bar of the Classics for Kids website with links for Home, Composers, Games, Music, Parents, and Teachers. Below the navigation bar is a decorative banner with the text 'Classics for Kids' and various musical notes. The main content area is titled 'This Week:' and features a section for Franz Joseph Haydn's Minuets. This section includes a small image of a minuet performance, a brief description of the dance form, and two green buttons for play and pause. Below the buttons are three blue links: 'Take This Week's Quiz', 'Download this month's Activity Sheet', and 'Learn more about Franz Joseph Haydn'.

Classics for Kids

This Week:

Franz Joseph Haydn:
Minuets

The minuet is a dance that started in the 1700's in the French court. Gradually, the minuet began to be used for non-dancing purposes, as a musical form -- especially as the third movement of symphonies. Minuets found their way onto the stage, too, in operas, plays, and ballets.

[Take This Week's Quiz](#)
[Download this month's Activity Sheet](#)
[Learn more about Franz Joseph Haydn](#)

This is a great resource to use with elementary students. Throughout this website you can find information about composers, games to play in class, music, information for parents, and more resources for teachers. As a teacher, I am interested in the “game” section as my students respond best to games and activities. I am also interested in the “This Week” section (pictures above). Starting my class with the same activity each day helps my students to settle in and I believe this would be a great resource to use next year!

Math Science Music (mathsciencemusic.org)- Tutorial

Math Science Music is a unique resource that stems from science. One of the things my administration wants to see is more integration of math, reading, science, in the music classroom. This would be a great resource to correlate my teaching with what fourth and fifth graders.
